

Simple Usage Tips for your Hidden Desk Clock DVR:

Congratulations on your purchase of our Desk Clock Hidden DVR! You'll find that it's incredibly easy to operate and the video/audio quality is excellent for all of your covert recording needs. THIS IS A QUICK GUIDE TO THE INCLUDED USER'S MANUAL; THE MINI CD IS NOT REQUIRED unless you are using Windows 98 as your operating system. SPECIAL DRIVERS ARE NOT REQUIRED FOR THIS DVR.

CHARGING: Connect the camera to the included USB port and then connect it to your computer or the included USB power adapter; allow your camera to charge for about 3 full hours before you use it the first time. Subsequent charges need only be for 1-2 hours max. The RED light on the camera will illuminate while charging.

RECORDING VIDEO WITH AUDIO: When your camera is OFF – you will not see any LED lights on the camera or clock face. Press and HOLD the Power button for 3-5 seconds, it will turn ON and the green light at the 9 O'clock position will illuminate and begin to flash.....AFTER IT QUICKLY FLASHES AND THEN DISAPPEARS – YOU ARE RECORDING VIDEO. Press and release the button, again, to STOP AND SAVE your video inside the camera. (You will NOT see any lights when you stop your video.) Too easy!

POWER OFF: Press and HOLD the power button to turn OFF your camera. You'll see the RED LED light illuminate and then flash quickly – when it disappears – your camera is OFF. Too easy!

File Playback: Use the included USB cable to connect your Desk Clock DVR to your PC or Laptop USB port. Your computer should recognize the device automatically. When you open the window for your Micro Camera – you'll see all of your saved files. They're saved in “.AVI” file format which can be viewed with your Windows Media player that is probably already installed on your PC. If you do not have it installed on your PC, then please know that any media player that recognizes .AVI files will work. If you cannot play the files on your computer – then please go to www.videolan.org to download their free media player. That's it! After just a few uses, your Micro Informer will become second nature to you. Enjoy!
